Who's It For?

A thrilling and mysterious read that's impossible to put down, perfect for fans of action/adventure/dystopia! Similar feel to stories such as Percy Jackson, Artemis Fowl and The Golden Compass.

What are People Saying About It?

"The first in a chilling adventure series about a sinking world that subtly addresses themes of migration and global warming. [...] A great adventure with a heartfelt message."

South Wales Evening Post

"I LOVED this book and am desperate to read the second instalment [...] Issues of the environment, discrimination, refugees and migration make this book pertinent to the current world order. The prose style is rich and engaging and worthy of study in any upper key stage literacy lesson."
